

Supporting research into FOP

Income from donations

Below is a chart showing annual donations to the FOP Research Fund at the University of Oxford, since 2002. The majority of our donations are from patients, families and friends, many of whom are fundraising on our behalf. Without this generous support, FOP research at Oxford would not be possible.

Please note that the 2010 figure above does not include the exceptional donation of £110,000 from Mr Richard Simcox to help appoint two new researchers at the University of Oxford to work on FOP. To learn more about this donation and FOP research at Oxford, please see the article called “New Members of the University of Oxford FOP Research Team” (dated 18 November 2010) in the “fopnews” section of the FOP ACTION UK website.
